Free: 3 AI Automations That Run Your Instagram

A free sample of The Instagram Growth Machine

3 steps from the full guide · copy-paste ChatGPT prompts · free tools only

AUTOMATION 1 OF 3

Batch a week of ideas and scripts

Goal: 20 ideas and 7 ready-to-record scripts in one sitting.

Free tools: ChatGPT / Gemini / Claude (free), Google Sheets

1. Run the idea prompt and paste the table into a Google Sheet.
2. Keep 7 ideas with a clear hook, one true takeaway, and that fit in under 30 seconds.
3. Run the script prompt for each and read every script aloud once.

Idea prompt

```
You are a content strategist for a faceless Instagram page about [NICHE].
Audience: [WHO] who struggle with [PROBLEM].
Give me 20 short-video ideas. For each: a 6-10 word hook, the one
takeaway, and the format (list / tutorial / myth vs fact / before-after).
Avoid hype and income claims. Output as a table.
```

Script prompt

```
Write a 25-second voiceover script (about 65 words) for a vertical video.
Topic: [IDEA]
Rules:
- Line 1 is the hook, max 8 words, no greeting.
- Then 3 short numbered steps, each one sentence, plain words.
- End with: "Follow for daily [NICHE] tips."
- No exaggerated claims, no emojis.
```

Batching is the real automation: 7 scripts at once takes far less time than 7 separate sessions.

AUTOMATION 2 OF 3

Turn one video into five posts

Goal: Get a carousel, story, thread and email out of every script you already wrote.

Free tools: ChatGPT (free), Canva (free)

1. Paste a finished script into the prompt below.
2. Design the carousel slides in a free Canva template.
3. Post the story poll the same day as the video.

Repurpose prompt

```
Turn this script into: 1 carousel (7 slides text),
1 thread (5 posts), 1 story poll, 1 email newsletter
(150 words), 1 Pinterest description. Script: [PASTE]
```

Hook generator

```
Give me 15 hooks (max 8 words) for a video about [TOPIC].
Mix: question, bold statement, 'stop doing X', number list.
```

Fact-check before posting

```
Check this script for claims that might be false, outdated or
exaggerated. List each and suggest a safer wording: [PASTE]
```

AUTOMATION 3 OF 3

Auto-answer your repeat DMs

Goal: Built-in replies handle common questions; you handle real conversations.

Free tools: Instagram Saved replies, Meta Business Suite Inbox automations

1. Instagram → Profile → ☰ → Creator/Business tools → **Saved replies**. Add a shortcut (e.g. */guide*) and the full message.
2. In Business Suite → Inbox → Automations, set an Instant reply and keyword replies where available (features vary by region and account).
3. Draft comment replies with the prompt below, then edit them so they sound like you.

Instant reply template

```
Hey! Thanks for the message. I reply personally within 24h.
Quick links: free checklist → [LINK] · guide → [LINK]
```

Comment reply prompt

```
Here are 10 comments on my post. Write a short, friendly,
genuine reply to each (max 20 words), answer any questions.
```

Only message people who asked. Mass unsolicited DMs can get your account restricted, and never give third-party apps your Instagram password.

WANT THE OTHER 7 STEPS?

The full Instagram Growth Machine

This sample is 3 pieces of a 10-step beginner guide (A5 PDF, $10 one-time). The full guide covers:

1. Picking your niche and audience
2. Setting up a secure Professional account
3. Choosing one free tool per job
4. Ideas and scripts (sample above)
5. Faceless videos with open-source MoneyPrinterTurbo or CapCut
6. Polish, covers and captions
7. Scheduling a week in Meta Business Suite
8. DMs and engagement (sample above)
9. Lead capture with Google Forms + automated email
10. Your link in bio and a weekly review

Plus a 7-day launch plan, a prompt library, master checklists and a glossary.

> **Honest note:** it's a skills guide, not a get-rich scheme. No followers, views or income are guaranteed.
